

Regional Oak Mast Survey Annual Mast Survey (AMS)

Instructions: The oak and beech crop survey can be completed anytime during August 15 – September 1. The crown of each tree should be scanned with binoculars for no more than 30 seconds. Please have a stopwatch on hand to limit searches to the allotted time. If any acorns or beech nuts are observed during the 30 seconds, report a 1 on the form for that tree. If no acorns or beech nuts are observed then enter a 0. Please total of trees with acorns or beech nuts. If a survey tree has died, blown down, or been cut, select a new tree to replace it. Record the new data on the Tree Data (TD) form.
